WEDNESDAY, OCTORER 10, 1877. HER Rayal Highness the Heir Apparent left for Kanai by the schooner Marion on Monday afternoon, receiving, on her departure the customary salute from the Punchbowl

WE find there are those among us who believe that the cause of public morality and the best interests of the community generally, are to be promoted by calling our corres pondents "rag pickers" and "gutter snipes." There is no accounting for tastes,

the GAZTETE shall "give an uncertain sound' on any matters of legitimate public interest. On certain questions affecting the moral wellbeing of this community and the proper relations of the law thereto, we have, we be lieve, some tolerably decided opinions which we purpose laying before the public at no distant day in the columns of the GAZETTE We prefer, however, to wait until some of the dust which prejudice, personal interests, and party and social rivalries have conspired to raise, has had a chance to somewhat subside

It is quite evident that the Advertiser is not pleased with our brief editorial on the position of the Attorney General, which appeared in the last number of the GAZETTE. As we cannot expect to always please everybody, we are not surprised that even the candid and courteons critic of the Advertiser takes occasicnal exception to our remarks. We consider it, however, due-not only to ourselves, but also to our readers, to say that the Advertiser's insituation of the article in question being written or suggested, either in whole or in part, by the Attorney General or any other outside party is entirely uncalled for and destitute of any foundation in fact. startling or strange in the world at large.

The death of Brigham Young, the Mormon Prophe and the death of Thiers the ex-President of the

THE ELECTION

Which has just been held in this City and State for which has just been held in this City and State for municipal officers and members of the Legislature has been the absorbing topic of interest to a multitude of people. It has passed, and there are many disappointed candidates lying about loose, with sore beads and eyes. It was a general scramble for office, for the bread that the office gives. Of cearse there was a Republican and a Democratic ticket, but there were a great many tickets besides, and the principles of party entered to a very small degree into the issues of the contest. In this city it takes about a very small degree into the issues of the contest. In this city it takes about a and it costs a bit a ballot, to make the count.

Now that it is over, disappointed candidates who

were nearly elected are determined on a recount, Elections in San Francisco cost a great deal of money-Probably the last election did not cost less than \$50,-000. Add this to the cost of all elections in this Union and what a yearly expenditure it gives as one

BILVER Is now the cheapest currency we have. \$100 in silver is now worth \$95.00 gold. \$100 in greenbacks in now worth \$97.00 gold. So silver is coming more and more lots general use. The exchanges at the San Francisco Clearing House set forth this fact in very strong light, and it is creating some alarm among bankers and others, lest business drift too largely in that direction. The old silver dollar con tained 4122 grains, while the two half dollars we now use contains only 385 grains. Nearly all labor in this city is paid in silver, and laborers have no situations. From them the silver goes to the traders and in most lines of trade competition is so active that merchants are compelled to take silver without

limit and get even with their cust omers some other way. Thus this silver question is upsetting all values. Just now we have about a milion dollars more subsidiary silver coin in the state than there is any demand for, and if things go on in this way we shall soon be worse off than the greenback states. The bullion value of two half dollars is 86 cents; the money value at the brokers is 96 cents, and the value in trade or labor is 100 cents. CALIFORNIA'S GRIEVANCE.

I refer to the irresistible chinaman. Col. Bee, who represented the chinese element before the Congreshas been interviewed. He has prepared the claim for damages for the destruction of property in the late riots in this city. These claims exceed the sum of \$125,000, and he is going to present them against the United States through Sir Edward Thornton the British Minister at Washington. Col. Bee says that there is great saffering among the poorer classes o in this city dependent upon the charity of their countrymen. To use Col. Bee's own language; he says: "The distress is really great. Large numbers will return to China if they can find the means, and there is an opening for chinese labor in Hawaii. The Reciprocity Treaty with that Kingdom has advanced the value of the sugar plantations 400 per cent. One of \$550,000 for the whole, and before the Treaty was passed this plantation could have been bought for \$10,000. Chinamen are wanted to cultivate the plan tations, and there is an opening for 2,500 immediately. They are going thitler from San Francisco."

are becoming cettled so that large estates can be partitioned and owners feel safe in making good provements on what they really own. One of the largest cases ever carried on in any of the state courts has lately been decided by Judge Dwiselle o the Fifteenth District Court. It is known as the "San Pablo Ranch Suit" and involves title to 17,638 acres of land in Contra Costa county valued at \$3,000,000. The complaint was filed ten years ago. The trial occupied more than a hundred days from time to time, and the testimony makes twenty-four volumes, which, placed one upon the other makes pile four feet high. The land in dispute is two-thirds of it good arable land and produces large crops o wheat and barley. The village of San Pablo is on the ranch, and the railroad now being built from Oakland to Martines runs through the tract. The case was submitted to the Court two years ago. The tecision lately given is embraced in 142 mans pages, and occupied more than two hours in the reading. The decision of the Judge sustains the Alvarudo Title, and more than doubles the value of the
